Adobe Portable Document Format Version of
Federal Aviation Agency booklet titled:

“William J. Hughes Technical Center Video Cassette Library”

followed by **full listing of 6484 films/videos**

18-May-2001

Thanks goes to Michael Ravnitzky mikerav@ix.netcom.com for locating and obtaining this material.

In response to a FOIA request to FAA for “all ... lists of video or films, including any and all listings of films including any lists posted on the FAA internal web sites,” FAA provided Mr. Ravnitzky a booklet listing a few hundred films/tapes. This booklet is reproduced in this .PDF file. Far from listing all films/tapes being maintained at the FAA’s William J. Hughes Technical Center in Atlantic City, New Jersey, the brochure lists only those which the FAA deems “... of interest for schools, briefings, training, exhibits, etc.” That same sentence notes that: “This listing does not include all Facility tapes on file...” Noting this, Mr. Ravnitzky made subsequent efforts and an FOIA appeal. In response the FAA finally provided a very large list of film/tapes on a wide range of subjects. This list is reproduced following the booklet.

Internal FAA email also released to Mr. Ravnitzky indicates that the FAA intends to remove the statement in the booklet referring to more films/tapes being maintained. Those same email messages stated: “if the requester requests a specific tape -s- from that list, which he probably will, we then will decide whether such tapes are releasable. I realize the tapes are security-sensitive. For that reason, we probably will deny the release of such tapes and include appeal rights in our response.” This should not deter you from requesting copies of films/videos through the Freedom of Information Act.

Requests for copies of films or tapes should be addressed to:

FAA William J. Hughes Technical Center
Television Facility, Act-73
Atlantic City International Airport NJ 08405

In your FOIA request letter, you must include the following text: “I request this film under the provisions of the Freedom of Information Act as amended.” This will invoke the FOIA.

**Archives for UFO Research,
News and Information Services**

You must also agree to pay reasonable fees, but you can limit expenditures to a specified amount by including text such as: "I agree to pay reasonable fees as provided in the FOIA up to a maximum of \$25.00. (or other specified amount) I request that I be notified in writing if it becomes evident that fees in excess of this amount will be incurred in the processing of this request."

Please note that the staff members of the FAA's William J. Hughes Technical Center contacted during the FOIA requests and appeal were at all times helpful and courteous. Their fine work should in no way should be diminished by the unfortunate actions of certain colleagues who prefer secrecy to public access.

.PDF file notes:

- The front and back covers of the FAA booklet are rendered in grayscale to save space in the file while the printed covers are color.
- The pagination is not the same as the FAA booklet and list. This is accounted for by the methods used to get the material into the .PDF file: OCR to a text file, opened and corrected/reformatted in Microsoft Word, then converted to PDF format using Adobe Acrobat. Page numbers were inserted by MS Word.
- The films/videos listed in this booklet also appear in the larger listing, but more detailed descriptions may appear in the booklet text.

PREFACE

This is a catalog of videocassettes available from the FAA William J. Hughes Technical Center Television Facility Library. This listing does not include all Facility tapes on file, but rather only those that would be of interest for schools, briefings, training, exhibits, etc. This catalog will be updated periodically, with an addendum. On the Internet the complete and most recent update can be found at www.its.tc.faa.gov/tapel

- All tapes can be transferred to BETACAM-SP, VHS or U-MATIC format to fit you requirement.
- Each request will be limited to three tapes.
